Percentage: 48.40%

PROJECTS

NGO Management & Donation Web Portal

2025

- Frontend Technologies - HTML, CSS, Bootstrap, Javascript
- Developed a responsive and user-friendly website for an NGO . The platform includes online donation options with fixed and custom amounts (7100-750,000), volunteer registration, project showcases, gallery, and contact form. Focused on accessible design, real-time engagement, and mobile responsiveness to support the NGO's mission and public outreach.

Portfolio Website – Personal Portfolio

2026

- Frontend Technologies - React.JS, HTML, CSS, Bootstrap, Javascript
- Built a personal portfolio website to showcase skills, education, and projects
- Deployed on GitHub Pages for live accessibility and professional presentation

AI SaaS Image Generator | MERN Stack

2026

- Frontend Technologies – React.JS, HTML, CSS, JavaScript
- Backend Technology – Node.js, Express.js, MongoDB, REST AP
- APIs: ClipDrop API, Payment Gateway

Developed a full-stack AI-powered text-to-image application. Users can create images from text prompts, manage their account, generate images using available credits, and purchase additional credits through an online payment system.

Key Features:

- User registration and login
- Text-to-image generation
- Credit-based image generation
- Online credit purchase
- User account management
- Responsive and user-friendly interface
